POTS and PANS Stay Bright As **CHINA PLATES**

We keep

through your doctor's

Elba Drug

When You Cook Electrically Because electric heat is as clean as sunshine, your pots and pans stay sparkling bright . . . clean as china plates . . . when Reddy does the cooking for you! There is no need to repaint your kitchen as often (electricity can't smudge the walls, ceiling and cabinets) and kitchen curtains remain fresh

and new looking much longer. But cleanliness was just ONE of three leading reasons why women prefer electric cooking. The other two are coolness and safety.

COOLER

An electric range is so cool you can place a flower on top of the oven while you bake a cake. Surface units impart the heat directly to cooking utensils, thus little or none escapes in your kitchen.

SAFE

No harm can result if a surface unit switch is accidentally left on. or turned on and forgotten. Automatic controls see to it that oven circuits are turned on and off at the proper times.

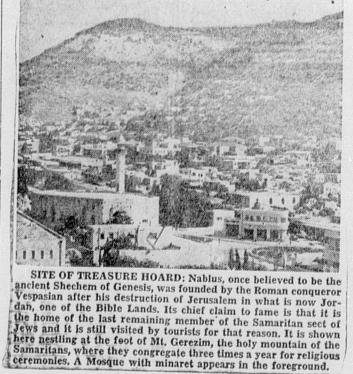

Other reasons for preferring electric ranges that ranked high in the Alabama survey were low operating cost, fast and uniform cooking results and attractive, modern styling to complement the beauty of present-day kitchens.

If you are modernizing your kitchen or merely planning to replace your old range with a new one, be sure to inspect the many new models of electric ranges at our store or your electrical appliance dealer's. You'll find that electric ranges give you the most for your money, and can be had on easy-
